STAFF FAVORITE -Kolleen

"I cannot go a day without my morning dose of this extraordinary product! Vitamin C, E, and Ferulic acid is a powerful skincare treatment that brightens skin, reduces fine lines, and protects against pollution and UV damage. Topical Vitamin E strengthens the skin barrier, locks in moisture, and neutralizes environmental free radicals caused by UV rays and pollution. Naturally present in your skin's sebum, its levels decline with age and sun exposure. Ferulic acid is an antioxidant that boosts skin protection by neutralizing free radicals, reducing dark spots, and multiplying the stability and power of Vitamins C and E. I LOVE this hero product that delivers a combo of proven antioxidants for longterm skin health!"

STAFF FAVORITE -Kerry

"I love the hyaluronic acid serum. If your skin is feeling dry, tight, or your fine lines more noticeable, hyaluronic acid can help. It deeply hydrates the skin, giving you a more healthy glow and a softer, more youthful appearance!"
